ART PHYTON

For horses and notably older horses requiring
a healthy joint mobility and function

www.equistro.com

PLANTS Selected plants such as devil's claw (*Harpagophytum*), blackcurrant (*Ribes Nigrum*), willow (*Salix alba*), horsetail (*Equisetum arvense*, a particularly rich silicon source), Canadian Fleabane (*Erigeron canadensis*) in combination with Glucosamine.

ART PHYTON is a pelleted complementary feeding stuff destined to support an optimal joint function in horses. **ART PHYTON** is particularly recommended for horses and notably older horses requiring a healthy joint mobility and function.

ART PHYTON provides *Harpagophytum procumbens*, *Equisetum arvense*, *Ribes nigrum*, *Salix Alba*, *Erigeron canadensis* and **Glucosamine HCl**.

In pellets formulation, **ART PHYTON** is very well-appreciated by horses. Easy to mix in the daily ration.

USAGE

ARTPHYTON is particularly recommended for older horses requiring a healthy joint mobility and function.

PACKAGING SIZE

1500 g & 4500 g Bucket

ADMINISTRATION

Adult horses (500kg) : 100 to 150 g daily

CONTROL DOPING

Before being released on the market, every **ART PHYTON** batches are analysed for environmental contaminant, ensuring that the product does not contain ingredients likely to make a positive doping test.

But, **ART PHYTON** contains Devil's claw (*Harpagophytum*), susceptible to render a positive doping test. Consult veterinary surgeon for withdrawal time.

COMPOSITION

Carob pods, Barley flour, Lucerne flour, Sucrose, Devil's claw (*Harpagophytum procumbens*) 6%, Horsetail (*Equisetum arvense*) 6%, Blackcurrant (*Ribes nigrum*) 3%, Willow (*Salix alba*) 3%, *Erigeron canadensis*, Brewer's yeast, Glucosamine HCl 2.5%.

Analysis: Crude fibre 11.5%, Crude protein 10.7%, Crude ash 7%, Moisture 7%, Ash insoluble in HCl 3%, Crude fat 1.9%, Sodium 0.2%.
